

DECORATIVE EPOXY FLOORING SYSTEMS

Zeraus Products Inc. offers the entire spectrum of decorative concrete flooring systems based on our advanced epoxy and waterborne technologies. They are specially formulated for both interior and exterior applications that combine both elegance and durability. Whether you're an architect, designer, or a home renovator, our complete range of products are available in a variety of choices and designs to meet your style, budget and needs.

JUST COMPARE THE LOOK!

These stylish high-end flooring systems are recommended for endless applications, including hotel lobbies, offices, retail shops, shopping malls, art galleries, studios, showrooms, lofts, furniture stores, restaurants, night clubs, casinos, up-scale home basements, counter tops and residential garage floors.

EPOXY METALLIC FLOOR

ZeraOrnate™ MF is an exotic multi-layer flooring system utilizing a 100% solids epoxy floor coating, specially formulated based on pearlescent metallic pigment technology. These fashionable artistically designed floors exhibit reflective sparkle and colour shifting properties like no other. By utilizing different colour combinations and techniques one can generate unlimited distinctive aesthetics for interior surface applications. We offer a number of different metallic effect-based colours to choose from to meet your particular project's needs.

It only takes one look and you will be captivated!

STAINING CONCRETE

Concrete Staining is one of the most stylish concrete finishes today. Unlike paints that produce opaque finishes, stains permeate the concrete to infuse it with rich, deep, highly attractive translucent tones. Concrete staining transforms an otherwise dull and ordinary concrete slab into a luxurious floor, resembling marble or glazed stone and does it in a cost-effective way.

There are three types of concrete staining systems available in the market today: acid-based, acetone-based, and water-based. Our unique one-part waterborne epoxy (**ZeraDite™ W-40**) can be used as a concrete stain simply by adding an appropriate amount of colourant to match your specific design requirement. **ZeraKlear™** (100% solids clear epoxy) or **ZeraTuf™ W-240LC** (clear waterborne epoxy) may be used as basecoats. A satin-finish **ZeraTuf™ 102** (waterborne urethane) is then used as a topcoat to control the sheen as well as protect from scratches, black heel marks or abrasion.

FLAKE EPOXY FLOORING

ZeraDelux™ FL is a multi-layer decorative flooring system consisting of an epoxy primer and vinyl flakes (or mica flakes) that is broadcasted onto a pigmented epoxy floor coating (**ZeraDur™ 100**). It is then coated with a clear topcoat, including **ZeraKlear™**, **ZeraBrite™** (aliphatic polyurethane), or **ZeraSpar™** (polyaspartic acid), thus generating a decorative, seamless flooring that is easy to install and maintain.

EXTERIOR CONCRETE FINISHES

We offer a number sealers, primers, and topcoats for exterior decorative concrete. For jewelstone applications, we recommend the use of **ZeraDite™ W-40** as the primer and sealer in conjunction with aliphatic high-solids glossy polyurethane (**ZeraBrite™**) or waterborne urethane (**ZeraTuf™ W-105** in semi-gloss), or polyaspartic acid (**ZeraSpar™**). All of these products are UV-stable and together provide excellent protection and enhancement of the appearance of jewelstone and other decorative floors.

NATURAL CLEAR EPOXY FLOORS

A clear epoxy finish is the most economical and aesthetic way of rejuvenating the look of existing concrete floors in offices, retail shops, art galleries, and other decorative end-uses. They consist of two coats of 100% solids epoxy coating (**ZeraKlear™**), followed by scratch resistant, clear waterborne urethane (**ZeraTuf™ W-102** in a satin finish or **ZeraTuf™ W-104** in a matte finish). We also offer a water-based epoxy alternative (**ZeraPrime™ W-48**).

We offer a variety of other decorative epoxy-based flooring systems as well as cutting-edge acrylic/urethane waterborne coatings, including pure white floors, textured quartz floors, terrazzo floors, stamped concrete finishes and polished concrete. Call us for details!
